

Amendments to the Specification:

Please replace the paragraph beginning at page 1, line 7, with the following redlined paragraph:

As the Internet evolves increasingly, users of the ~~Intranet~~Internet, Internet Service Providers (hereinafter referred to as ISP) and broadband networks grow rapidly, the categories of network service are becoming profuse, and network usage is gradually diversified. In such a case, operators and managers of network services demand to master user's usage of network resources in detail so as to implement more flexible accounting, plan reasonably, and manage and monitor network resources effectively.
